Burbank, CA 91506

Dear Per:

This letter confirms that West Beach Systems installed a CCTV system covering the campus grounds of Robinson Elementary School in Manhattan Beach in 2007. This system will give school officials the capability to view the system via LAN in the principal's office as well as remotely from the police station, should the need arise.

The installation went as planned with minimal disruption to the school. All service requests have been responded to in an extremely timely manner. The school has contracted West Beach Systems for a 24 month service and maintenance contract.

We are also pleased to report that the number of vandalism incidences has been reduced since the installation. And in two cases where the vandalism was caught on the video cameras, the Manhattan Beach police were able to identify and arrest the suspects.

Other schools within the district are considering West Beach Systems for their security needs.

Sincerely,

Laurel Wright
PTSA President
Robinson Elementary School
